

Capstone Prelim Ideas

Please complete this document and email to Michelle@polco by June 1, 2023.

The goal of the capstone is to put your learning to work! Our criteria for a good capstone project follow:

1. It demonstrates the use of data in decision making. This can be through use of data in a plan, budget document, grant writing or performance measurement. Using data to address internal organizational issues also is a great use of data. There are many activities where you can use data – feel free to be creative!
2. It will be useful to your organization. Find an activity that will move your organization forward. Even a small step in using data can help build organizational capacity and interest.
3. The project can be completed (or completed well enough to demonstrate competency) by the end of August.

Please list the ideas you have for your capstone below. If you are considering multiple options, please list them all!
